GLOSSARY

The following terms used in the Standards for Accreditation have specific meanings as defined here:

Academic Standards – Expectations for what students are expected to know and to be able to do with what they know in the content areas included in the educational program.

Accreditation Standards – Qualitative statements that reflect research-based best practices for schools.

Distance Education – Education that uses, as its primary mode of instructional delivery, an alternative to traditional classroom-based instruction, such as via the Internet, mailed correspondence, or fax.

Early Age Education – A program serving families and their children from infancy through age six years in settings such as schools and early childhood centers.

Facilities – A school’s building(s), grounds, furnishings, equipment, and vehicles.

Faith-Based Indicators – Indicators of quality that apply to unique aspects of Catholic and other faith-based schools. The use of the Faith-Based Indicators by Catholic and other faith-based schools is voluntary and not required, unless their use is directed by the head of a parent school system such as a Diocesan/Archdiocesan or a similar system of schools. The Faith-Based Indicators allow faith-based schools, if they desire, to include in their self-study and accreditation process Indicators of Quality that address unique characteristics of and expectations for schools whose mission and educational program are defined wholly or in part by their particular faith.

Families – Parents, guardians, caregivers, or others in a custodial relationship with a learner.

Governance – The group or individuals charged with overseeing the direction of the school; may be a governing body, board of trustees, board of education, advisory committee, or some other configuration.

Information Resources – Electronic, print, and other media, as well as interactive learning materials available through a library, in the classroom, or in the wider community that complement course materials and textbooks and enhance the educational program.

Leadership – The head of the school and school system, members of the administrative staff of the school and school system, and all others in administrative positions.

Long-Range Plan – A plan that assumes that the future is fixed and already known; a plan not based on a vision of what the future might or could be but, instead, focused on improving existing systems. The locus of control in long range planning is often external to the organization.

Mission – The unifying theme or vision that illuminates the reason for the school's existence, the audience that it serves, and its distinctive character.

Philosophy – The expression of beliefs about the nature of the learner and the processes and relationships that should exist within the school to positively affect learning.

Quality – A level of excellence expected by the school's stakeholders and respected by the larger community.

Related Services – Services that respond to the needs of identified students with special education needs such as speech-language, occupational therapy, physical therapy, and other specialized services.

School – Any type of educational organization seeking school accreditation.

School System – A system of schools that meets the following criteria—

- A legal entity
- A system consisting of more than one component school
- A single governing body
- A chief executive officer or superintendent, or
- A group of faith-based schools affiliated within a community, organization, or diocese

Stakeholders – Individuals or groups that have a stake in the future of the school; may be school leaders, teachers, members of the staff, students, families, governing bodies, community members, alumni, business partners, and others.

Strategic Plan – A plan based on the principle that the locus of control is inside the organization, because planning is based on the organization’s vision of a preferred future; plan that assumes that, as a human organization, the institution has the ability to exercise control over external factors and can create the future; plan that creates a desired reality and outlines the actions to be taken to obtain that reality.

Student Support Services – Services, or referrals to services, that address the emotional, physical, and social needs of students, and as appropriate involve their families, including guidance and counseling, speech-language services, occupational therapy, and physical therapy.

INTRODUCTION

The Middle States Association of Colleges and Schools (MSA) was established in 1887 and is a nongovernmental, nonprofit, peer-administered organization. MSA provides leadership in school improvement for its member schools in many areas of the United States, including but not limited to Delaware, Maryland, New Jersey, New York, and Pennsylvania, the District of Columbia, the U.S. Caribbean, and schools in many countries outside the United States including but not limited to Europe, the Middle East, Asia, and Africa.

The Middle States Association has three accrediting commissions:

- The Commission on Higher Education (MSCHE) serves academic, degree-granting institutions and evaluates and accredits post-secondary institutions and programs.
- The Commission on Secondary Schools (MSCSS) evaluates and accredits institutions providing middle and/or secondary education, including vocational-technical schools that offer non-degree-granting post-secondary programs.
- The Commission on Elementary Schools (MSCES) serves institutions that provide middle, elementary, and early age education.

The elementary and secondary Commissions—operating as the Commissions on Elementary and Secondary Schools—evaluate and recommend the granting of accreditation for institutions providing early age through grade 12 or 13 education or any combination of grade levels served by the Commissions.

THE ROLE OF STANDARDS IN THE ACCREDITATION PROCESS

The Middle States Standards for Accreditation are qualitative statements that reflect research-based best practices for schools. These Standards complement content area standards, which designate what students are expected to learn in various curriculum areas. The latter may be incorporated in the accreditation process in a variety of ways, but because content standards vary among schools, states, and overseas locales, it is not possible to designate a single set of content standards for all Middle States accredited schools.

Middle States Standards for Accreditation have several important functions in the accreditation process. Most importantly, they serve as a mechanism for improving a school's ability to produce the levels of student performance that are both desired and expected by its community of stakeholders. Because they are based on research and reflect best practices, they serve as a qualitative guide to expectations for an accredited school. The standards are not designed to make all schools look alike. The Middle States accreditation process respects the individual nature and character of each school. The diversity of Middle States member schools reflects this important principle. Although it is required that all schools meet the same Standards for Accreditation, there is sufficient flexibility within the Standards so that different schools can demonstrate they meet the Standards in different ways.

Standards are used to make accreditation decisions by the Commissions with input from their advisory committees, readers, and staffs in various ways, depending on the self-study protocol selected by the school. The same set of Standards is used with all protocols to provide a consistent model of quality. By no means, however, do the Standards determine what a school *must* look like.

The Commissions on Elementary and Secondary Schools offer several self-study and accreditation protocols. Each protocol requires a distinct use of the Standards for Accreditation.

Many schools, especially at the elementary levels, are encouraged to use self-study instruments that are based on a coherence theory of evaluation. This self-study evaluation model requires the school to define itself rather than respond to pre-set criteria. The visiting team then uses the self-definition as a lens to determine whether the nature and quality of the students' experiences in the school are consistent with those called for in the self-definition. The visiting team provides the school with a critique to strengthen the school's ability to move forward. Trained readers apply the Standards after carefully analyzing the school's self-study and the visiting team's report. The coherence of these documents *and* adherence to the Standards leads to the Commission's decision on accreditation.

Increasingly, schools elect to use a strategic planning self-study protocol or one of the numerous collaborative protocols designed by cooperating accreditation agencies that have been approved by the Commissions. In these cases, the school addresses the Standards during the self-study phase and determines its own degree of adherence to the Standards. Many schools utilize the Standards as a school improvement tool against which to judge development and performance. In these cases, the visiting team applies

the Standards during the visit and provides specific judgments in a written report on major strengths and areas for improvement. The Commissions' staff, in addition to a reader and/or an advisory committee, provides an additional review of the school's adherences to the Standards.

The Commissions make final accreditation determinations based on recommendations from this review process. The Commissions conduct multiple levels of review to ensure a consistent, informed, and fair decision regarding accreditation is made.

THE ROLE OF INDICATORS OF QUALITY IN THE ACCREDITATION PROCESS

Indicators of Quality have been developed for each Standard. The Indicators amplify a Standard and show possible ways that a school, evaluator, advisory committee, or reader can demonstrate that a particular Standard is met. Indicators provide greater clarity regarding best practices for each Standard. Schools and evaluators are encouraged to expand upon the Indicators in order to emphasize unique characteristics of each school.

Middle States member institutions represent a highly diverse group of schools. The accreditation standards serve as expectations for quality in a school and as guidelines for school improvement through planning and future development. The Indicators provide multiple ways to apply Standards. Although it is expected that all accredited schools will meet the Standards, not all Indicators will apply to or be appropriate for each school. It is imperative that the use of Indicators respects the individual integrity of each school and that no attempt to conform a school's operation to these Indicators be made.

A number of the Standards for Accreditation include sub-sets of Indicators that are applicable to different types of schools and to schools with special programs or services. For example, the Governance and Leadership Standard includes a set of Indicators for independent/non-public schools and a different set of Indicators for schools in public school districts, archdiocesan/diocesan systems, and other school organizations with a central office staff. For some of the Standards, there are also Indicators for schools that have early age programs and Indicators for schools that deliver some or all of their educational program using distance education. Each school uses only the Indicators that

are applicable and appropriate for the school and may delete from their self-study any sub-sets of Indicators that do not apply to their school.

THE STANDARDS FOR ACCREDITATION FOR SCHOOLS

Organization of the Standards

The Standards for Accreditation and Indicators of Quality are numbered for ease of reference only. No added weight or other significance should be attributed to those numbers. Additionally, the Standards are organized in two broad categories based on the following:

Foundational Standards: Standards addressing best practices in the components of a school that provide the *foundations* for quality in the education program, services, and results in terms of student learning.

- Philosophy/Mission
- Governance and Leadership
- School Improvement Planning

- Facilities
- School Climate and Organization

Operational Standards: Standards addressing best practices in delivering the education program, services, and activities to the students.

- Health and Safety
- Educational Program
- Assessment and Evidence of Student Learning
- Student Services
- Student Life and Student Activities
- Information Resources and Technology

PHILOSOPHY/MISSION STANDARD FOR ACCREDITATION

The Standard: The school has a clearly written and actively implemented statement of philosophy/mission that conveys the general and specific purposes of its educational program, expresses expectations for quality, and serves as the basis for daily operational and instructional decision making as well as long-range planning. ACCREDITATION ACTIONS

The following are the action the Commissions may take regarding the accreditation of a school:

Accreditation Actions for Previously Accredited and/or Candidate Institutions (as noted):

Accreditation (for previously accredited institutions and candidate institutions)

An “Accredited” institution is an educational organization that meets all MSA Standards for Accreditation, adheres to applicable MSA policies, and meets the requirements of the self-study protocol used. The institution agrees to adhere to the requirements for maintenance of accreditation, and there are no outstanding issues related to the Standards or requirements of the protocol that would require monitoring or on-site visits beyond the normal expected events required by the protocol utilized. Commission action is required.

Accredited with Stipulations (for previously accredited institutions and candidate institutions)

An institution “Accredited with Stipulations” is an educational organization that meets all MSA Standards for Accreditation, adheres to applicable MSA policies, and meets the requirements of the self-study protocol used. However, the institution has been given stipulations in one or more areas that require follow-up and monitoring in order to ensure that the stipulations are met. In such cases, MSA will identify the stipulations and specify the nature, purpose, timelines, and scope of any corrective action required or additional information to be submitted to the Commission(s) by the institution. Subsequent reports and/or on-site visits may be required to provide the Commission(s) with assurance that appropriate corrective action has been taken. Corrective action must take place within the specified time limit unless otherwise approved by the President/Executive Director(s). Commission action is required.

Probationary Accreditation (for previously accredited institutions)

An institution granted Probationary Accreditation is a previously MSA accredited educational organization that does not meet one or more of the MSA Standards for Accreditation, does not adhere to applicable MSA policies, and/or does not follow the requirements of the self-study protocol used. The institution is provided with specific corrective actions that must be followed in order for the institution to have its accreditation in good standing reinstated with MSA. Subsequent reporting and/or onsite visits confirming those corrective actions are required within defined time limits in order for the entity to remove probation and gain accreditation for the full term as specified by the protocol used. Probationary Accreditation is typically granted for a period of one year, but shall not exceed a maximum of three years. Commission action is required.

Removal of Accreditation (for previously accredited institutions)

The Commission(s) may remove the accreditation of a previously accredited educational organization for one or more of the following reasons:

- Failure of the institution to correct the deficiencies that led to Accreditation with Stipulations, Limited Term Accreditation, or Probationary Accreditation
- Failure of the institution to continue to meet the MSA Standards for Accreditation
- Failure of the institution to adhere to timelines for self-study, accreditation maintenance, and planning expectations
- Failure of the institution to submit required MSA reports
- Failure of the institution to pay approved dues and fees
- Inability or unwillingness of the institution to adhere to Commission policies and/or procedures

When the Commission(s) remove the accreditation of an institution, this action will be recorded in the Commission's permanent records for the institution. Commission action is required.

Accreditation Actions Which Apply to Candidate Institutions only

Limited Term Accreditation (for candidate institutions)

An institution with Limited Term Accreditation is an educational organization that meets all MSA Standards for Accreditation, adheres to applicable MSA policies, but has conditions or issues to address and/or does not fulfill all expectations associated with the accreditation protocol used. In such cases, the Commission will specify the nature, purpose, and scope of any further information to be submitted by the institution. The corrective action required is of an immediate nature and must be addressed by a specific deadline in order for the institution's accreditation term to be extended to the full term of accreditation. Issues are such (in complexity and seriousness) that the Commission recommends a shortened accreditation term and additional monitoring activities are scheduled. A follow-up report and a special visit are required before the accreditation term can be extended. Should the accreditation of the institution be extended to the full term of accreditation, the period of time that the institution is accredited for the limited term shall be subtracted from the normal term of accreditation. Commission action is required.

Accreditation Postponed (for candidate institutions)

An institution with Accreditation Postponed is an educational organization, not currently accredited by MSA, for which an accreditation action is postponed because one or more of the Standards for Accreditation are not met, applicable MSA policies are not adhered to, and/or deficiencies in the self-study process were identified during the team visit. Specific corrective action will be required. An onsite visit may be required to verify that the specified corrective action has been taken. If evidence of progress in taking corrective action is not evident within one year, the institution will be presented to the Commission for a review of its continued Candidacy. Commission action is required.

Accreditation Denied (for candidate institutions)

An institution with Accreditation Denied is an educational organization, not currently accredited by MSA, for which accreditation is denied when there are significant violations of Standards for Accreditation, applicable MSA policies are not adhered to, and major shortcomings in the self-study process are identified during the team visit. Violations will be specifically identified by MSA. Membership will be terminated. The institution will be permitted to reapply for candidacy only when the deficiencies have

been corrected and an onsite visit confirms that corrective action has been taken. The institution may not reapply for candidacy for at least one year and must initiate the candidacy process from the beginning. Commission action is required.
